

Exporting AI conversation logs ▾

Share

1. AI Conversation Logs

Export your most important AI conversations:

2. 3-5 representative conversations showing AI assistance
3. Format: PDF or text files
4. Label each: 'AI_Log_[topic]_[date].pdf'
5. Examples of good logs to include:

- Debugging a critical error
- Designing a complex visualization
- Optimizing performance
- Refining data cleaning approach

How to export:

6. ChatGPT: Use share link feature or copy/paste to document
7. Claude: Use share feature or screenshot conversation
8. GitHub Copilot: Screenshot relevant suggestions

Show less

I can help you export your Claude conversations! Here are the best ways to do it:

From Claude.ai:

1. **Share link** — Open a conversation, click the share icon (top right), and copy the link. You can then open that link and print/save as PDF from your browser.
2. **Copy/paste** — Select all the conversation text, paste into a Word doc or Google Doc, then export as PDF. Label it `AI_Log_[topic]_[date].pdf`.
3. **Screenshot** — For shorter conversations, screenshots work well. Stitch them together in a tool like Preview (Mac) or IrfanView (Windows).
