I'm getting this error on Mac terminal:
"zsh: command not found: python"
I'm trying to run: python cord19_cleaning.py
How do I fix this?

This is a very common Mac issue! Modern Macs don't include `python` (Python 2) anymore — only `python3`. Here's how to fix it:

Quick fix — just use `python3`:

```
bash  
  
python3 cord19_cleaning.py
```

Permanent fixes (so `python` works too):

Option 1 — Create an alias (simplest):

```
bash  
  
echo 'alias python=python3' >> ~/.zshrc  
source ~/.zshrc
```

Option 2 — Check if Python is installed at all:

```
bash  
  
python3 --version
```

If you get `command not found` here too, Python isn't installed. Fix with:
